# GENDER PAY GAP

## INTRODUCTION

AM2PM Recruitment Solutions (Birmingham) Ltd (“AM2PM Recruitment”) is a recruitment business, providing temporary labour to our clients who mainly operate in the industrial, logistics and driving sectors.

It is a requirement from April 2017 that all businesses employing more than 250 employees must publish a report detailing their gender-pay gap. Each legal entity within a group structure which employs over 250 people must report their own figures. AM2PM Recruitment is the only business within the AM2PM group of companies which falls into this category.

The information that must be published for the business is the:

- mean gender pay gap
- median gender pay gap
- mean bonus gender pay gap
- median bonus gender pay gap
- proportion of males and females receiving a bonus payment
- proportion of males and females in each pay quartile

As is required by the legislation, this report is drawn from information obtained on and prior to the snapshot date of 5<sup>th</sup> April 2022 and includes information of our hourly wage paid temporary workers.

We have very little control over the wages paid to temporary staff as this is largely dictated by our Clients, however we are confident that our Clients do not set differentials set based on gender.

## RESULTS

Mean Gender-Pay Gap

Median Gender-Pay Gap

This shows that males are paid higher on average than females.

# GENDER PAY GAP

## Mean Bonus Gender-Pay Gap

## Median Bonus Gender-Pay Gap

Bonuses are not common amongst agency staff in the industries which we supply as can be seen from the below figures.

## Proportion of Males and Females Receiving Bonus Payment (%)

Proportion of males receiving bonus  
**0.02%**

Proportion of females receiving bonus  
**0.02%**

## Proportion of Males and Females in each Pay Quartile

	Male (%)	Females (%)
Upper Quartile	90%	10%
Upper Middle Quartile	60%	40%
Lower Middle Quartile	60%	40%
Lower Quartile	60%	40%
<b>Total Males in Business</b>	<b>251</b>	<b>66%</b>
<b>Total Females in Business</b>	<b>128</b>	<b>34%</b>

As we have more males within our business, males dominate each pay quartile. We believe this is likely due to the nature of the work supplied by our Clients, which being mainly industrial and driving, in general attracts males more than it does females across the industry.
